

WONDAFIX®

In March 1985 spectators watched anxiously as a crane lifted a 13tonne bulldozer several meters' off the ground.

The bulldozer was suspended on a hair-thin layer of WONDAFIX® between two thick steel plates.

WONDAFIX® carries a world-wide patent which combines unusually high-strength with flexibility, is abrasion resistant, bonds to most materials and resists water and most chemicals.

"It is Pratley policy to manufacture and market products, the performance of which, must at all times exceed that of any other directly competing product on the World Market! We invite you to put this statement to the test."

K.G.M. Pratley (Group C.E.O.)
